

## SPECIFICATION

### GENERAL INFORMATION

Titanium Dioxide Rutile Type for Color Masterbatch JMR-230 ——This kind of rutile titanium dioxide uses sulfuric acid to process production. After special surface treatment, it has an excellent dry powder flow, hydrophobic, low moisture absorption, high temperature anti-yellowing and other properties. Can be easily dispersed in the plastic system, and can be well applied to high temperature casting film and other high temperature processing technology.

### PROPERTIES

Item	Specification
TiO <sub>2</sub> content%	97
Reynolds number (Tcs)	2000
Dispersibility (Hegman index)	6.25
Oil absorption g/100g	16
290°C Volatile substance%	0.2
Weatherability	medium
Rutile Content %	98

### PACKAGE

25KG,500KG,1000KG BAGS

### NOTE

The above information is provided as guidelines only.It is important that the customer evaluate any product in their own resin system to determine suitability.
