

TITANIUM DIOXIDE R-2195

Characteristics

R-2195 is a rutile titanium dioxide pigment treated with inorganic silicon and aluminum. It features high hiding power, high color elimination power and easy dispersion. As a universal product, R-2195 is widely used in coating, ink, profile, color master, paper and other industries.

Application fields

- Coatings
- Ink
- profile
- Color master batch
- Paper

Specification

Quality index	Technical requirement
The content of titanium dioxide, %	93
Inorganic coating	Si,Al
Volatile at 105°C, %	0.3
Color CIE L*(GB/T5211.20-1999)	95.4
Oil absorption, g/100g	20
Organic gravity	Yes
Tinctorial power (TCS)	2040
PH value of aqueous suspension	7.5
Resistivity, Ω -m	80

Packaging

25kg paper-plastic composite bag
500kg and 1000kg ton bag

Remarks

Product index will be subject to inspection report
